ABOUT ME

Second-year B.E. CSE (Data Science) student at Chandigarh University with hands-on experience building data-driven applications, blockchain analytics tools, and web projects. Strong interest in Data Science, Machine Learning, problem solving, and backend development. Currently strengthening Data Structures & Algorithms, Python, SQL, and software engineering fundamentals.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science Engineering (Data Science)
Chandigarh University
2025 – 2029

Senior Secondary (Class XII)
Hansraj Public School, Panchkula
2024 – 2025

Secondary (Class X)
Army Public School, Kandrori
2022 – 2023

TECHNICAL SKILLS

Languages: Python, C++, C, Java, SQL

Data & Machine Learning: Data Analysis, Statistics, Pandas, NumPy, Scikit-learn

Backend & Development: FastAPI, REST APIs, HTML, CSS

Databases & Tools: MySQL, PostgreSQL, Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Data Science Fundamentals

INTERPERSONAL SKILLS

Communication Skills
Team Collaboration
Problem-Solving
Time Management
Adaptability

PROJECTS

PROJECTS

TRACECHAIN | Cryptocurrency Fund-Flow Intelligence Platform

Tech: Python, FastAPI, Pandas, NetworkX, TRON TRC-20

- Built an investigative analytics platform for analyzing suspicious bank transactions and tracing cryptocurrency fund flows across wallet addresses.
- Implemented financial-data ingestion, transaction normalization, suspicious pattern detection, and beneficiary analysis.
- Developed value-weighted breadth-first blockchain traversal for multi-hop TRC-20 USDT fund-flow analysis and transaction-graph construction.
- Implemented explainable risk indicators, exchange-address attribution, evidence hashing, and automated investigation-report generation.

GitHub: <https://github.com/sohan972/tracechain>

SMART ENERGY METER | Energy Consumption Forecasting

Tech: Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Built a data-driven system to analyze historical electricity consumption and predict future energy usage.
- Implemented data preprocessing, exploratory data analysis, and feature engineering for predictive modeling.
- Trained and compared forecasting models to identify a suitable approach for future-value prediction.
- Evaluated model performance using [ACTUAL•METRIC] on the test dataset.

GitHub: <https://github.com/sohan972/smart-energy-meter>

OCEAN GUARDIAN | Ocean Awareness & Conservation Platform

Tech: HTML, CSS, JavaScript, [OTHER ACTUAL TECHNOLOGIES]

- Built and deployed a web platform focused on ocean awareness, conservation, and environmental education.
- Developed structured web pages and interactive components to present ocean-related information.
- Implemented and deployed the application as part of a semester project.

GitHub: <https://github.com/sohan972/ocean-guardian>

Live Demo: <https://oceanguardianss.netlify.app/>

WEBSTORE | E-Commerce Web Application

Tech: HTML, CSS, JavaScript, [BACKEND TECHNOLOGY]

- Developed an e-commerce web application with product listings and core shopping functionality.
- Implemented frontend components and integrated application functionality for product browsing and user interaction.
- Worked on application structure, deployment, and frontend/backend integration.

Live Demo: ever-more.netlify.app
